SKC is a special purpose nonprofit outsourcing agency that provides reasonably priced administrative and business services to nonprofit organizations of all sizes. This arrangement allows nonprofits to devote more staff and volunteer time to mission-related activities.

SKC performs many support services directly using its cadre of in-house staff. In addition, SKC is equipped to serve in a project management role, utilizing a network of carefully screened specialists who work under contract on a task-by-task basis.

Because Support Kansas City is itself a 501 (c) (3) organization, its personnel are particularly attuned to the needs of the nonprofit community. This means service delivery that is effective, efficient and professional, as well as affordable. SKC provides nuts-and-bolts functions such as bookkeeping and database support, along with technical assistance in more complex areas such as fundraising and special events management.

SKC has been providing services to the nonprofit community since 2001 and has assisted over 100 agencies. Currently we work with over 50 agencies on an ongoing basis. SKC employs a staff of 11 committed nonprofit professionals who understand the special needs of the nonprofit community.
